

Scaling and Root Planing (Deep Cleaning)

Purpose: Non-surgical periodontal therapy to remove plaque, tartar, and bacteria from below the gumline and smooth root surfaces to promote healing.

First 24 Hours:

- Mild gum soreness and slight bleeding are normal.
- Increased tooth sensitivity to temperature or sweets may occur temporarily.
- Avoid extremely hot or spicy foods.

Pain & Sensitivity:

- Use OTC pain relievers if necessary.
- Sensitivity toothpaste can help reduce discomfort.

Oral Hygiene:

- Brush twice daily with a soft-bristled toothbrush.
- Floss daily, being gentle around treated areas.
- Use an antimicrobial mouth rinse if prescribed.

Diet:

- Soft diet for the first day to minimize irritation.
- Avoid alcohol-containing beverages or rinses during healing.

Special Precautions:

- Do not smoke for at least 48 hours, as it can delay healing.
- If localized antibiotic therapy was placed, follow special instructions given by your provider.

Follow-Up:

- Attend scheduled periodontal maintenance appointments every 3–4 months.
- Contact the office if swelling, persistent bleeding, or severe pain develops.
