

## Biopsy (Oral Soft Tissue)

Purpose: Removal of a small tissue sample from the mouth for laboratory examination.

First 24 Hours:

- Mild bleeding and swelling are normal.
- Avoid spitting, rinsing, or using straws for the first 24 hours to protect the clot.
- Apply an ice pack externally in 15-minute intervals to reduce swelling.

Pain & Sensitivity:

- Use prescribed or OTC pain relievers as directed.
- Some mild discomfort when chewing or speaking is normal.

Oral Hygiene:

- Brush teeth gently, avoiding the biopsy site for the first few days.
- Rinse with warm salt water starting 24 hours after the procedure to promote healing.

Diet:

- Eat soft, cool foods for the first 48 hours.
- Avoid spicy, acidic, or crunchy foods that may irritate the area.

Special Precautions:

- Avoid touching or pulling on the biopsy site with your tongue or fingers.
- If stitches are placed, follow instructions for care and removal.

Follow-Up:

- Biopsy results are typically available within 1–2 weeks.
- Contact the office if there is excessive bleeding, severe pain, or signs of infection.
