

## Oral Biopsy

Purpose: Removal of a small sample of oral tissue for laboratory examination to diagnose abnormalities.

First 24 Hours:

- Minor bleeding and mild discomfort are normal.
- Apply gentle pressure with gauze to control bleeding.
- Keep the head elevated when resting.

Pain & Sensitivity:

- Take prescribed or OTC pain medication as directed.
- Sensitivity in the area is common for a few days.

Oral Hygiene:

- Brush carefully, avoiding the biopsy site for the first day.
- Rinse gently with warm salt water starting 24 hours after the procedure.

Diet:

- Soft foods for the first day.
- Avoid spicy, acidic, or crunchy foods that may irritate the site.

Special Precautions:

- Avoid smoking and alcohol until healing is complete.
- Do not disturb the site with your tongue or fingers.

Follow-Up:

- Attend follow-up visits to review biopsy results and further treatment if needed.
- Contact your dentist if bleeding persists, swelling worsens after 3 days, or signs of infection appear.
