

## Surgical Extraction of Cysts or Benign Lesions

Purpose: Removal of cysts or benign growths from the jawbone or soft tissues to prevent damage, infection, or distortion of normal structures.

First 24–48 Hours:

- Swelling and mild discomfort are common.
- Apply ice packs to the surgical area for 15–20 minutes at a time during the first 24 hours.
- Keep head elevated when resting to minimize swelling.
- Avoid spitting, rinsing, or using straws for the first 24 hours.

Pain & Sensitivity:

- Take prescribed pain relievers and antibiotics as directed.
- Some bruising may occur in the surrounding tissues.

Oral Hygiene:

- Gently brush teeth away from the surgical site.
- Begin warm salt water rinses after 24 hours to aid healing.

Diet:

- Soft diet for the first few days.
- Avoid hard, crunchy, or spicy foods that may irritate the site.

Special Precautions:

- Do not smoke or consume alcohol during the healing period.
- Avoid touching or disturbing the surgical site.
- Follow instructions for any drains or packing material placed.

Follow-Up:

- Stitches may be dissolvable or require removal.
- Contact the office if there is increased pain, swelling after 3 days, pus drainage, or fever.
