

Gum Contouring (Gingivoplasty)

Purpose: Cosmetic procedure to reshape the gum line for improved appearance, often performed with a laser or scalpel.

First 24–48 Hours:

- Mild swelling, tenderness, and minor bleeding are normal.
- Apply ice packs to the outside of the face for 15–20 minutes at a time during the first few hours.
- Keep head elevated while resting.

Pain & Sensitivity:

- Take over-the-counter or prescribed pain medications as directed.
- Mild sensitivity to temperature changes is common.

Oral Hygiene:

- Avoid brushing directly on treated gums for the first few days.
- Use prescribed mouth rinses to keep the area clean.

Diet:

- Eat soft, cool foods for the first 48 hours.
- Avoid spicy, acidic, or crunchy foods until healing progresses.

Special Precautions:

- Avoid smoking and alcohol during healing.
- Do not pull on the lips or cheeks to view the gums.

Follow-Up:

- Attend any scheduled follow-up visits to monitor healing.
- Contact your dentist if swelling worsens after 3 days, bleeding persists, or you notice signs of infection.
