

Odontoplasty (Tooth Reshaping)

Purpose: Conservative reshaping of tooth enamel to improve appearance, correct bite interferences, or prepare for other dental procedures.

First 24 Hours:

- Minimal discomfort is expected.
- Mild sensitivity to hot, cold, or sweet foods may occur temporarily.
- No swelling or bleeding should occur.

Pain & Sensitivity:

- Sensitivity can be managed with desensitizing toothpaste.
- OTC pain relievers can be used if necessary.

Oral Hygiene:

- Brush and floss as normal, using gentle technique.
- Avoid extremely abrasive toothpaste for the first week.

Diet:

- No dietary restrictions are typically needed.
- Avoid extremely hot or cold foods if sensitivity is present.

Special Precautions:

- Avoid biting hard objects (ice, pens) to prevent enamel fracture.
- In cases where bonding was placed after reshaping, avoid staining foods for 48 hours.

Follow-Up:

- Schedule regular dental checkups to monitor the reshaped teeth.
- Contact the office if sensitivity worsens or chips/cracks occur.
