

Sinus Lift Surgery

Purpose: Surgical procedure to add bone below the sinus for future implant placement.

First 24 Hours:

- Avoid blowing your nose or sneezing with your mouth closed to protect the surgical area.
- Keep head elevated while resting.
- Do not rinse, spit, or use a straw.

Pain & Swelling:

- Mild swelling and discomfort are expected.
- Use prescribed or OTC pain relievers as directed.
- Apply ice packs to the cheek for 20 minutes on/off for the first 6–8 hours.

Bleeding:

- Light bleeding from the nose or mouth is normal for 1–2 days.
- Apply gentle pressure with gauze if oral bleeding increases.

Oral Hygiene:

- Avoid brushing directly over the surgical site for several days.
- Use antimicrobial rinse if prescribed.
- Brush and floss other areas normally.

Diet:

- Soft foods for at least 1 week.
- Avoid hard, crunchy, or sticky foods that may disturb the site.

Special Precautions:

- Avoid air travel, swimming, or scuba diving for at least 2 weeks, or as directed.
- If you must sneeze, do so with your mouth open.

Follow-Up:

- Stitches may be removed in 1–2 weeks.
- Contact the office if you experience nasal discharge of graft material, severe pain, or swelling after day 3.
