

## Sleep Apnea Appliance Delivery

Purpose: Custom oral appliance designed to reposition the jaw or tongue to maintain an open airway during sleep.

First 24 Hours:

- Wear the appliance as instructed, typically every night.
- Some mild soreness or tightness in teeth and jaw is normal initially.

Pain & Sensitivity:

- Use OTC pain relievers if needed.
- Perform any jaw stretching exercises recommended by your dentist.

Oral Hygiene:

- Brush and floss teeth before inserting the appliance.
- Clean the appliance daily with a toothbrush and mild soap or appliance cleaner.
- Avoid hot water to prevent warping.

Diet:

- Do not eat or drink (except water) while wearing the appliance.

Special Precautions:

- Store the appliance in its protective case when not in use.
- Keep away from pets, as they may chew on it.

Follow-Up:

- Bring the appliance to check-ups for evaluation and adjustment.
- Contact the office if discomfort persists, the appliance feels loose, or breathing issues return.
