

Post-Operative Instructions

Surgical Orthodontics (Orthognathic Surgery)

First 24–72 Hours

- Swelling, bruising, and soreness are normal.
- Apply ice packs and keep head elevated.
- Take prescribed medications as directed.

Diet

- Soft or liquid diet recommended initially.
- Gradually return to solid foods as tolerated.

Oral Hygiene

- Rinse gently with salt water or antimicrobial rinse.
- Brush carefully around surgical sites once cleared.

Follow-Up

- Attend all follow-up appointments with surgeon and orthodontist.
- Call immediately if you experience severe bleeding, fever, or difficulty breathing.
