

## Sinus Augmentation (Sinus Lift)

**Purpose:** Surgical procedure to add bone to the upper jaw in the area of the molars and premolars, lifting the sinus membrane to make room for bone grafting, often in preparation for implants.

**First 24–72 Hours:**

- Swelling, bruising, and mild bleeding from the nose or mouth are normal.
- Apply ice packs to the cheek area for 15–20 minutes at a time during the first day.
- Keep your head elevated when resting.

**Pain & Sensitivity:**

- Take prescribed pain medications and antibiotics as directed.
- Avoid blowing your nose or sneezing forcefully to protect the graft site.

**Oral Hygiene:**

- Brush teeth gently, avoiding the surgical area.
- Use prescribed antimicrobial rinses to keep the mouth clean.

**Diet:**

- Soft foods for at least one week.
- Avoid using straws or creating suction in the mouth.

**Special Precautions:**

- Avoid bending over or heavy lifting for the first week.
- Do not smoke or drink alcohol during healing.

**Follow-Up:**

- Attend scheduled visits to monitor graft integration and sinus health.
- Contact your dentist if swelling worsens after 3 days, there is excessive nasal bleeding, or signs of infection develop.
