

Denture Reline

Purpose: Adjustment of the inner surface of a denture to improve fit and comfort.

First 24 Hours:

- Wear dentures as instructed, typically for the first 24 hours continuously to help adapt to the new fit.
- Some minor soreness or pressure spots are normal.

Pain & Sensitivity:

- Use OTC pain relievers if needed.
- Warm salt water rinses can soothe irritated gums.

Oral Hygiene:

- Remove dentures daily for cleaning using a denture brush and cleanser.
- Clean gums, tongue, and any remaining teeth with a soft brush.

Diet:

- Start with soft foods and gradually reintroduce firmer foods as comfort improves.
- Chew evenly on both sides.

Special Precautions:

- Do not attempt to adjust dentures yourself.
- Keep dentures moist when not in use to prevent warping.

Follow-Up:

- Adjustments may be needed to fine-tune the fit.
- Contact the office if discomfort persists or dentures feel unstable.
