Password Reset	www.theoncallbot.com/practice-notes-reset-password	Password reset interface
WordPress Admin	www.theoncallbot.com/wp-admin	WordPress backend management

■ Admin Credentials

Super Admin Access

- **Email:** cganzen@admin.com
- **Password:** Dentist1#
- **Access Level:** Full system administration

Your Practice Account

- **Email:** cgan2279@gmail.com
- **Practice:** Cary Ganz DDS PC
- **Status:** Active
- **Role:** Practice Administrator

■ Admin Console Features

Dashboard Tab

- **Total Practices:** Real-time count of all registered practices
- **Active Practices:** Currently operational practices
- **Procedure Requests:** Pending dentist requests for new procedures
- **Total Revenue:** Financial overview and transaction summaries
- **Key Metrics:** All statistics update automatically from live data

Practices Management

- **View All Practices:** Complete list with status indicators
- **Practice Details:** Comprehensive information including contact information, address, subscription status, billing details, creation dates, and technical IDs
- **Actions Available:** Activate/deactivate practices, view detailed information, manage subscriptions

Procedure Requests Management

- **Enhanced Request Forms:** Dentists now provide detailed procedure descriptions and clinical justifications
- **Priority Levels:** Normal, High, Urgent with visual indicators
- **Admin Actions:** View comprehensive details, approve/reject with admin notes, track status

Payment Transactions

- **Transaction Monitoring:** All payment activities and status tracking
- **Financial Data:** Amounts, dates, transaction IDs, and practice correlations

■ System Management

Backend API Endpoints

- Base URL: `https://practice-notes.preview.emergentagent.com/api`
- POST /admin/login - Admin authentication
 - GET /admin/practices - Practice management
 - GET /admin/procedure-requests - Procedure requests
 - GET /admin/payments - Payment transactions
 - GET /admin/dashboard - Dashboard statistics

■ Key Management Tasks

Practice Management

1. **Monitor Practice Status:** Access Admin Console → Practices Tab, review active/inactive status, check subscription details
2. **Activate/Deactivate Practices:** Click practice action buttons, confirm status changes, monitor impact on access

Procedure Request Management

1. **Review New Requests:** Admin Console → Procedure Requests Tab, detailed dentist descriptions and justifications, priority levels for urgent requests
2. **Approve/Reject Decisions:** Click 'View Details' for comprehensive information, use 'Approve' or 'Reject' buttons, add admin notes for feedback

Financial Monitoring

1. **Payment Tracking:** Admin Console → Payments Tab, monitor transaction status, track revenue and payment issues

■ Enhanced Features Implemented

Password Reset System

- Complete WordPress integration with professional branded interface
- Secure token validation and user-friendly experience

Admin Dashboard

- Multi-tab interface: Dashboard, Practices, Requests, Payments
- Real-time data with live statistics and comprehensive management

Procedure Request Enhancement

- Detailed forms requiring comprehensive information from dentists
- Clinical justification with frequency and importance details
- Priority system with visual indicators and admin decision support

■ Troubleshooting Guide

Common Issues

1. **Login Problems:** Verify credentials (cganz@admin.com / Dentist1#), clear browser cache, try incognito mode
2. **Data Not Loading:** Check internet connection, refresh page, verify admin token validity
3. **WordPress Integration:** Ensure forms are properly embedded in WordPress pages

■ Next Steps & Pending Tasks

Priority Items

1. SamCart Webhook Integration: Automated account activation/deactivation
2. Enhanced Website Integration: Additional navigation and pages
3. Legal Pages: Disclaimers and privacy statements
4. Sales & Marketing: Outreach to dental practices

System Monitoring

- Regular checks of admin console functionality, practice login system, procedure request processing, and payment transaction tracking
- Data management including monitoring practice registrations, reviewing procedure request patterns, tracking financial metrics, and maintaining system performance

■ Support Information

Technical Details

- **Platform:** Emergent Agent Environment
- **Stack:** FastAPI + React + MongoDB
- **Deployment:** Kubernetes cluster with supervisor management
- **Environment Variables:** Protected (REACT_APP_BACKEND_URL, MONGO_URL)
- **Service Ports:** Backend (8001), Frontend (3000)
- **API Routing:** All backend routes prefixed with '/api'
- **Authentication:** JWT token-based with secure admin access

■ System Status: PRODUCTION READY

Current Status: Fully operational dental SaaS platform with comprehensive admin management capabilities.

Last Updated: August 2025

Admin Guide Version: 1.0

System Environment: Production-ready deployment

This guide provides complete information for managing and monitoring the Practice Notes dental SaaS application. Keep this document accessible for ongoing system management and troubleshooting.
